

# SRQCN now offers the par8o referral management program

## What is par8o?

The St. Rose Quality Care Network (SRQCN) is offering par8o for all referral management as a seamless referral process for all providers. By utilizing par8o's platform, SRQCN's network of physicians will benefit from a simplified and streamlined referral workflow, ensuring that patients have access to the right provider at the right time.

## Why par8o?

par8o has been designated as the main referral processing system for all Traditional Medicare patients to aid in management of the MSSP (Medicare Shared Savings Program) agreement with the goal of improving patient quality of care while working to reduce cost of patient care.

## This will support the process of capturing referrals for your attributed lives by:

- Easier identification of attributed Medicare members through the par8o Care Compass platform beginning in early April
- Customized ranking criteria to keep referrals in-network which helps improve patient quality and cost of care
- Easy to follow work queue for the lifecycle of referral
- Supports positive patient experience and quality metrics
- Transparency on referral responsiveness on the receiving side
- par8o's platform is built on algorithms that match a patient to the right resource at the right time

For questions about SRQCN and MSSP, please contact Alicia Erosa at [Alicia.Erosa@dignityhealth.org](mailto:Alicia.Erosa@dignityhealth.org).  
For Questions about par8o or your par8o account, please contact Stacey Sarmiento at [Stacey@par8o.com](mailto:Stacey@par8o.com).
